CalderaCare

Get the full experience with CalderaCare

Guaranteed support response times

Ticket-based technical assistance

New version Updates & upgrades

UNLOCK EXCLUSIVE FEATURES

Print Standard Verifier
Carry out conformity checks of your printing processes. Meeting international standards for color consistency is essential when printing for large accounts.

Integration with Third-Party Tools
Use the REST API to connect CalderaRIP with a webshop or ERP, and benefit from a more efficient workflow with automatic job submission, job spooling and cost tracking.

Automatic Job Submission
SmartImport extracts metadata from the filename (copies, printer, presets, height, width, scale) to automate job submission and processing.

Hardware Acceleration
Take advantage of your computer's full capacity to speed up ripping and printing times, and to process files with greater speed and efficiency.

- **Manage Cutting Operations in the Same RIP**
  No need for a separate solution to manage your cutting productions. You can drive flatbed cutting devices with CalderaRIP to streamline print-to-cut workflow.

- **Prepare Jobs for Automatic Trimmers**
  Automate trimming workflow, save time, and increase production speed. This module gives your cutting workflow another significant asset.
