

Film Antifouling

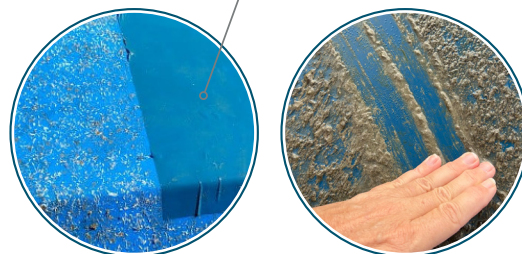

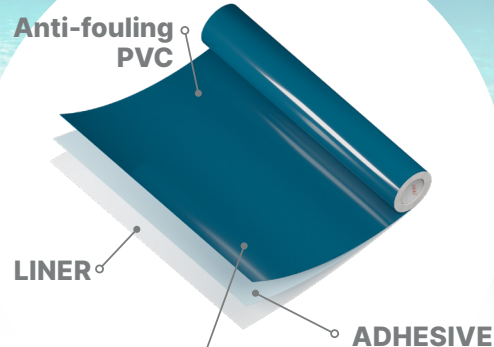

An environment-friendly solution

Anti-fouling film, intended for protection against subaquatic organisms

Active surface* with antifouling formulation, multi-layered cast PVC developed to withstand the marine environment and conform to the contours of the hull.

Product characteristics

- Waterproof multi-layered self-adhesive film
- Cast PVC
- 120µm thickness
- Blue satin finish
- Silicone-coated kraft paper liner
- Solvent-based acrylic adhesive
- Underwater durability up to 2 years

Product benefits

Optimised installation and removal

- Does not require sanding
↳ no dust/particles generated
- Faster removal, limiting downtime for the boat
- SEACOAT film can be recycled

* Presence of biocides

The HEXIS +

Eliminates tedious edge-to-edge work, offering the possibility of overlapping widths.

Before each application, please carefully read the technical documentation available on www.hexis-graphics.com

SEACOAT
Shield the Sea. Style the Surface.
